

Information Governance, Compliance and GDPR

Governance and control of your data is at the core of everything we do at Smartdesc.

Our in-house team of Information Governance (IG), Compliance, Policy and Data Security experts provide tailored services to help organisations develop, publish, train and embed their data handling policies and processes.

We act as Data Protection Officers for clients to help them audit and certify that they adhere to legal obligations and best practice, coordinate Subject Access Requests (SARs) and remain GDPR compliant.

We also carry out independent penetration tests, gap analyses and provide support obtaining certifications such as Cyber

Essentials and ISO27001 – without the need for expensive third-party consultants to undertake the work.

The IG team work seamlessly with our IT Director, Project and Support teams to identify and remediate risks of non-compliance, and deliver on these areas as a service, removing the overhead on organisations who may not have in depth IT governance skills in-house.

Information Governance policies and procedures such as Mobile and BYOD

Information Security awareness and training for staff

IT Risk Register development and review

Ongoing GDPR compliance

Cyber Essentials certification support

ISO27001 certification support

Data Protection Act compliance audits and remediation support

Penetration Tests and Vulnerability Reports

Smartdesc Secure – a fully managed, fixed cost suite of IT security services
