

Project Management and Digital Transformation

The Smartdesc Project Management Service runs projects with agility and control; our goal is to manage risk, respond to evolving demands and deliver prototypes early to ensure projects deliver the benefits they promise in the shortest possible time.

We have refined our approach over many years helping numerous organisations of all sizes to successfully deliver IT projects, either from the outset or by rescuing projects or programmes that are off track.

Our achievements range from small upgrades to large Office 365 or Cloud migrations, implementing agile working environments and enabling fully integrated remote working, to £2m+ nationwide IT migrations for 700+ staff members managing multiple third parties and stakeholders.

Smartdesc act as strategic partners to organisations in the UK overseeing Digital Transformation programmes such as CRM migrations, policy & procedure improvements, Business Process Optimisation, supplier management, mentoring and coaching.

- ▶ Turnkey, fixed cost project delivery.
- ▶ Developing Business Cases, ROI and Cost v Benefit analysis.
- ▶ An agile approach to delivering prototypes, demos, pilot systems and UAT.
- ▶ Governing and controlling projects being delivered by 3rd parties.
- ▶ Risk, Issue and Incident Management following a hybrid of Agile and Prince2 methods.
- ▶ Microsoft Partners: Office 365, Microsoft Azure and Cloud technology specialists.
