Phishing Simulation Service

Safely test and improve how your staff handle malicious email.

91% of all cyber attacks begin with a phishing email. As cyber criminals become more sophisticated in their methods, it is more important than ever that staff are trained on how to recognise and report phishing emails.

Our Phishing Simulation Service provides your staff with regular, real-world examples of cyber attacks with varying levels of plausibility. We monitor the results and provide charity-specific Cyber Security training for any compromised users to ensure they understand what to do in the event of a real attack.

Benefits .

▶ **Increased awareness:** Make your staff aware of common phishing attacks and how to report them.

▶ **Tailored to non-profits:** We are non-profit IT experts - our simulations and training modules are tailored to the sector.

▶ **Enhanced security:** Our service vastly reduces the risk of a cyber security breach, protecting your charity brand reputation.

▶ **Industry best practice:** Benefit from advice and ad-hoc consultancy from our team of highly-qualified Information Security Consultants.

▶ **Lower Cyber Insurance costs:** Ensuring effective IT Security measures are in place can help to reduce your Cyber Insurance premium.

What is included?

Regular phishing simulations over the year, or tailored to meet your organisation's individual needs.

Real-time reports on simulation results to visualise staff awareness and trends over time.

Cyber awareness training modules for compromised users to strengthen security, tailored to the non-profit sector.

Expert cyber security consultancy available on an ad-hoc basis where weaknesses are found, and support plans to improve them.

Professional, qualified service, fully integrated with existing IT teams/service desk to ensure there is no disruption.

Leverages Microsoft 365 non-profit discounts to minimise cost for charities.
